Miscellaneous

The CEPII is animating a Group of Scientific Interest (GIS) focused on Trade policy, created in 2002, jointly with the INRA (French institute for agronomic research) and the French Ministry of Finance (Forecasting Directorate and Directorate for External Economic Relationships). This Group facilitates exchanges and co-operation between its members, and organises seminars on trade policies.

The CEPII has in addition provided to GTAP successive versions of the MAcMap database in the GTAP classification, in view to serve as input for the GTAP 6 database. Updated documentation for this database is made available at <http://www.cepii.fr/anglaisgraph/bdd/macmap.htm>.

A detailed version of MAcMap-HS6, version 1 (at the HS6 level), has been made available to board members. This same version is also publicly available from the CEPII, conditional to the payment of \$900 to ITC (UNCTAD-WTO). Contact: macmap@cepii.fr
