

## **Special organized session for the 2020 GTAP conference in Japan: “Recent developments in the GTAP data and modelling framework”**

The objective of this organized session is to highlight recent developments in the GTAP satellite accounts and related modelling framework for the GTAP 10 database. On the data side, presentations would include GTAP air pollution database, GTAP-Power database, Land use and land cover (LULC) database, Global migration (GMig) database, domestic trade and transport margins in GTAP, Tariff analytical and simulation tool for economists (TASTE) and shared socioeconomic pathways (SSP) database for GTAP. On the modelling side, recently developed versions of the GTAP-HS and GTAP-RD models would be presented in this session.

### **Presenters:**

**Angel Aguiar:** Global migration (GMig) database, TASTE.

**Maksym Chepeliev:** GTAP air pollution, GTAP-Power, Shared socioeconomic pathways (SSP) database for GTAP.

**Erwin Corong:** Land use and land cover (LULC) database, domestic trade and transport margins in GTAP, GTAP-HS and GTAP-RD models.
