

Chapter 2

Guide to the GTAP Data Base

***Badri Narayanan G., Betina V. Dimaranan
and Robert A. McDougall***

The GTAP Data Base is the global data base representing the world economy for a given reference year — 2004 for the GTAP 7 Data Base. The files comprising the GTAP Data Base are packaged with two alternative aggregation packages. The GTAP Data Base includes all the data files in the data packages, except for the time series trade data. It comprises four files: sets, parameters, main data, and energy volume data. All the files are header array files (a GEMPACK binary format) (Harrison and Pearson, 1998).

This chapter provides a guide to the components of the four GTAP Data Base files. It also covers the concordances for the 57 sectors and 113 regions of the GTAP 7 Data Base. Details about sources and construction of the individual components such as domestic data bases (or I-O tables), international data sets, and parameters, are provided in subsequent chapters.

2.1 GTAP Sets File

Table 2.1 shows the arrays in the sets file. The array H1 is a list of regions. H2 lists *traded commodities*, so called because these goods and services can be traded between regions. In this, they contrast with the primary factors or *endowment commodities*, listed in H6: land, unskilled labor, skilled labor, capital, and natural resources. Capital is specified in array H9 as the *capital endowment commodity*, for convenience in implementing the investment theory of the model.

The arrays H7 and H8 divide the endowment commodities into two groups. The *mobile* endowment commodities (H8) are perfectly mobile across industries within each region; the *sluggish* endowment commodities (H7) are imperfectly mobile or immobile. In the standard data base, skilled and unskilled labor and capital are classed as mobile, and land and natural resources as sluggish. This is suitable for long-run simulations. For short-run simulations, users may wish to move capital from H8 to H7, to treat it as sluggish rather than mobile.

The remaining arrays are provided for convenience in implementing the theoretical structure of the GTAP model. The *non-savings commodities*, array H3, comprise the endowment commodities, the traded commodities, and an investment good. The *demanded commodities*, H4, comprise endowment and traded commodities; the *produced commodities*, H5, comprise traded commodities and the investment good. Finally, array MARG lists the margin commodities.

Table 2.1 Arrays in the GTAP Sets File

Name	Dimension	Description
H1	r	Regions
H2	t	Traded commodities
H3	$s+m+t+1$	Non-saving commodities
H4	$s+m+t$	Demanded commodities
H5	$t+1$	Produced commodities
H6	$s+m$	Endowment commodities
H7	s	Sluggish endowment commodities
H8	m	Mobile endowment commodities
H9	1	Capital endowment commodity
MARG	g	Margin commodities

g number of margins commodities (sectors)

m number of primary factors perfectly mobile across industries

r number of regions

s number of primary factors not perfectly mobile across industries

t number of tradable commodities (sectors)

Users of the GTAP model should note that the derived arrays H3, H4, and H5 are obsolete as of gtap.tab release 5.1 (they are now derived internally in the solution program). Also obsolete are the sluggish and mobile endowment commodity arrays H7 and H8; the sluggish/mobile distinction is now indicated with a parameter, SLUG (section 2.3).

2.2.1 GTAP Regions

In the standard GTAP 7 Data Base, there are 57 commodities and 113 regions. The commodity detail and concordance is the same as in the GTAP 6 Data Base. The regional detail has significantly increased from the 87 regions in GTAP 6 through the inclusion of domestic data bases for several new regions and through the revised grouping of composite regions.

Table 2.2 shows the regional definitions used in GTAP 7 Data Base. The 113 regions are defined as aggregates of 226 countries using the GTAP standard country list (see section 2.2.2). The alpha-3 codes defined by the International Organization for Standardization (ISO) are used as country codes for the GTAP primary regions, i.e. regions developed from contributed domestic data bases.

Table 2.2 Regions in the GTAP 7 Data Base

	Code	Name	Code	Member Countries
1	AUS	Australia	AUS	Australia

2.2.2 GTAP Standard Countries

A group comprised of 226 countries formed the set of standard countries in the construction of the GTAP 7 Data Base. The identification of a set of standard countries is key to achieving the goal of regional flexibility in the data base construction process. Regional flexibility is attained when new regions can readily be added to the data base by simply including the new region(s) in a list of regions and a mapping file used in the data construction process and supplying the additional country's input-output table.

To achieve regional flexibility, contributors of international data sets to GTAP are encouraged to provide the data on a country basis rather than on a GTAP region basis. This facilitates revision of the GTAP regional classification without having to go back to the data contributors for new, reclassified source data. The contributed data is then mapped or transformed to apply to the set of standard countries. A mapping between the standard set of countries and the set of GTAP regions is then used to aggregate the data (see table 2.2). The mapping file is revised when a new region is introduced in the GTAP Data Base.

The country composition of the set of standard countries for GTAP 7 is such that it omits no significant economies and it captures all significant information from the contributed

international data sets. We obtain a GDP estimate for each standard country for use as a scaling factor in aggregating data sets.

2.2.3 GTAP Sectoral Classification (GSC2)

Tables 2.3 and 2.4 show the sectoral definitions used in the GTAP 7 Data Base. We define the GTAP agricultural and food processing sectors by reference to the Central Product Classification (CPC), as shown in table 2.3. The other GTAP sectors are defined by reference to the International Standard Industry Classification (ISIC), as shown in table 2.4. We use the ISIC for most sectors, because it is the reference point for sectoral classification in most I-O statistics. But for agriculture and food processing, the ISIC does not provide the detail we need, so we use instead the CPC. The CPC was developed by the Statistical Office of the United Nations to serve as a bridge between the ISIC and other sectoral classifications (UN 1990, 1991).

Table 2.3 GSC2 Sectors defined by Reference to the Provisional CPC

GSC2 No.	Code	CPC Code	Description
1	pdr	0113	Rice, not husked
		0114	Husked rice
2	wht	0111	Wheat and meslin
3	gro	0112	Maize (corn)
		0115	Barley
		0116	Rye, oats
		0119	Other cereals
4	v f	012	Vegetables
		013	Fruit and nuts
5	osd	014	Oil seeds and oleaginous fruit
6	c b	018	Plants used for sugar manufacturing
7	pfb	0192	Raw vegetable materials used in textiles
8	ocr	015	Live plants; cut flowers and flower buds; flower seeds and fruit seeds; vegetable Seeds
		016	Beverage and spice crops
		017	Unmanufactured tobacco
		0191	Cereal straw and husks, unprepared, whether or not chopped, ground, pressed, or in the form of pellets; swedes, mangolds, fodder roots, hay, lucerne (alfalfa), clover, sainfoin, forage kale, lupines, vetches and similar forage products, whether or not in the form of pellets
		0193	Plants and parts of plants used primarily in perfumery, in pharmacy, or for insecticidal, fungicidal or similar purposes
		0194	Sugar beet seed and seeds of forage plants
		0199	Other raw vegetable materials
9	ctl	0211	Bovine cattle, sheep and goats, horses, asses, mules, and hinnies, live
		0299	Bovine semen
10	Oap	0212	Swine, poultry and other animals, live
		0292	Eggs, in shell, fresh, preserved or cooked
		0293	Natural honey

Table 2.3 GSC2 Sectors defined by Reference to the Provisional CPC

GSC2 No.	Code	CPC Code	Description
		0294	Snails, live, fresh, chilled, frozen, dried, salted or in brine, except sea snails; frogs' legs, fresh, chilled or frozen
		0295	Edible products of animal origin n.e.c
		0297	Hides, skins and furskins, raw
		0297	Insect waxes and spermaceti, whether or not refined or colored
11	rmk	0291	Raw milk
12	wol	0296	Raw animal materials used in textile
13	frs	03	Forestry, logging and related service activities
19	cmt	21111	Meat of bovine animals, fresh or chilled
		21112	Meat of bovine animals, frozen
		21115	Meat of sheep, fresh or chilled
		21116	Meat of sheep, frozen
		21117	Meat of goats, fresh, chilled or frozen
		21118	Meat of horses, asses, mules or hinnies, fresh, chilled or frozen
		21119	Edible offal of bovine animals, swine, sheep, goats, horses, asses, mules or hinnies, fresh, chilled or frozen
		2161	Fats of bovine animals, sheep, goats, pigs and poultry, raw or rendered; wool grease
20	omt	21113	Meat of swine, fresh or chilled
		21114	Meat of swine, frozen
		2112	Meat and edible offal, fresh, chilled or frozen, n.e.c.
		2113	Preserves and preparations of meat, meat offal or blood
		2114	Flours, meals and pellets of meat or meat offal, inedible; greaves
		2162	Animal oils and fats, crude and refined, except fats of bovine animals, sheep, goats, pigs and poultry
21	vol	2163	Soya-bean, ground-nut, olive, sunflower-seed, safflower, cotton-seed, rape, colza and mustard oil, crude
		2164	Palm, coconut, palm kernel, babassu and linseed oil, crude
		2165	Soya-bean, ground-nut, olive, sunflower-seed, safflower, cotton-seed, rape, colza and mustard oil and their fractions, refined but not chemically modified; other oils obtained solely from olives and sesame oil, and their fractions, whether or not refined, but not chemically modified
		2166	Maize (corn) oil and its fractions, not chemically modified
		2167	Palm, coconut, palm kernel, babassu and linseed oil and their fractions, refined but not chemically modified; castor, tung and jojoba oil and fixed vegetable fats and oils (except maize oil) and their fractions n.e.c., whether or not refined, but not chemically modified
		2168	Margarine and similar preparations
		2169	Animal or vegetable fats and oils and their fractions, partly or wholly hydrogenated, inter-esterified, re-esterified or elaidinised, whether or not refined, but not further prepared

Table 2.3 GSC2 Sectors defined by Reference to the Provisional CPC

GSC2 No.	Code	CPC Code	Description
		217	Cotton linters
		218	Oil-cake and other solid residues resulting from the extraction of vegetable fats or oils; flours and meals of oil seeds or oleaginous fruits, except those of mustard; vegetable waxes, except triglycerides; degreas; residues resulting from the treatment of fatty substances or animal or vegetable waxes
22	mil	22	Dairy products
23	pcr	2316	Rice, semi- or wholly milled
24	sgr	235	Sugar

2.3 GTAP Parameters File

The parameters file contains invariant behavioral parameters and switch parameters, arranged in ten arrays, as listed in table 2.5. A detailed description of the parameters and their source data is available in detailed version of the documentation.

Table 2.5 Arrays in the GTAP Parameters File

Name	Dimension	Description
ESBD	t	elasticity of substitution between domestic product and imports
ESBM	t	elasticity of substitution between imports from different regions
ESBT	t	elasticity of substitution between composite intermediate inputs
ESBV	t	elasticity of substitution between primary factors in the production of value-Added
ETRE	s	elasticity of transformation between industries for sluggish primary factor Endowments
INCP	$t \times r$	expansion parameter in the CDE consumer demand system
RDLT	1	binary switch mechanism of allocating investment funds
RFLX	r	flexibility of expected net rate of return on capital stock with respect to Investment
SLUG	e	sluggish-mobile switch parameter
SUBP	$t \times r$	substitution parameter in the CDE consumer demand system

e Number of factor endowments

r Number of regions

s Number of primary factors not perfectly mobile between industries

t Number of tradeable commodities (sectors)

2.4 GTAP Data File

The main data file consists of dollar values of flows of goods and services listed in table 2.6.

Table 2.6 Data Arrays in the GTAP 7 Data File

Name	Dimension	Description
ADRV	$t \times r \times r$	anti-dumping duty
DPSM	r	sum of distribution parameters in the household demand system
EVFA	$e \times p \times r$	primary factor purchases, at agents' prices
EVOA	$e \times r$	primary factor sales, at agents' prices
FBEP	$e \times p \times r$	factor-based subsidies
FTRV	$e \times p \times r$	factor employment tax revenue
ISEP	$t \times p \times r \times d$	intermediate input subsidies
MFRV	$t \times r \times r$	export tax equivalent of MFA quota premium
OSEP	$t \times r$	ordinary output subsidy
POP	r	Population
PURV	$t \times r \times r$	export tax equivalent of price undertakings
SAVE	r	net saving, by region
TFRV	$t \times r \times r$	ordinary import duty
TVOM	$t \times r$	sales of domestic product, at market prices
VDEP	r	capital depreciation
VDFA	$t \times p \times r$	domestic purchases, by firms, at agents' prices
VDFM	$t \times p \times r$	domestic purchases, by firms, at market prices
VDGA	$t \times r$	domestic purchases, by government, at agents' prices
VDGM	$t \times r$	domestic purchases, by government, at market prices
VDPA	$t \times r$	domestic purchases, by households, at agents' prices
VDPM	$t \times r$	domestic purchases, by households, at market prices
VFM	$e \times p \times r$	primary factor purchases, by households, at market prices
VIFA	$t \times p \times r$	import purchases, by firms, at agents' prices
VIFM	$t \times p \times r$	import purchases, by firms, at market prices
VIGA	$t \times r$	import purchases, by government, at agents' prices
VIGM	$t \times r$	import purchases, by government, at market prices
VIMS	$t \times r \times r$	imports, at market prices
VIPA	$t \times r$	import purchases, by households, at agents' prices
VIPM	$t \times r$	import purchases, by households, at market prices

Table 2.6 Data Arrays in the GTAP 7 Data File

Name	Dimension	Description
VIWS	$t \times r \times r$	imports, at world prices
VKB	r	capital stock
VRRV	$t \times r \times r$	export subsidy equivalent of voluntary export restraints
VST	$t \times r$	margin exports
VTWR	$m \times t \times r \times r$	margins by margin commodity
VXMD	$t \times r \times r$	non-margin exports, at market prices
VXWD	$t \times r \times r$	non-margin exports, at world prices
XTRV	$t \times r \times r$	ordinary export tax

d = number of trade directions (exports, imports);

e = number of endowment commodities (primary factors);

m = number of margin commodities (sectors);

p = number of produced commodities;

r = number of regions;

t = number of tradeable commodities (sectors)

The main data file also includes arrays summarizing the value of revenue generated from protection measures and the subsidy expenditures related to support measures. These values are all in millions of 2004 U.S. dollars in the GTAP 7 Data Base.

The protection data is available in the GTAP data file both implicitly and explicitly. Implicitly, the rates of different protection instruments may be calculated from two matrices which refer to two different valuations of the same value flow. Table 2.7 shows the protection measures that may be calculated from the data base and the arrays associated with these measures. The import and export duties calculated from the data base are the comprehensive measures, described in the detailed documentation.

The protection data explicitly declared in the GTAP data file are the revenue values or expenditure values associated with the protection measures. The revenues/expenditures from the different types of import and export instruments are given in separate arrays. These explicit arrays are TFRV, XTRV, MFRV, ADRV, PURV, VRRV, OSEP, ISEP, and FBEP in table 2.6. Protection rates are also explicitly summarized in a tax rates file.

Table 2.7 Implicit Protection in the GTAP Data File

Protection Measures	Formula*	Description
Import Duties	VIMS / VIWS	power of import tax (comprehensive)
Export Duties	VXMD / VXWD	power of export tax (comprehensive)
Output Subsidies	VOA / VOM	power of output tax
Intermediate Input Subsidies		
Domestic Inputs	VDFA / VDFM	power of domestic intermediate input tax
Imported Inputs	VIFA / VIFM	power of imported intermediate input tax
Factor-Based Payments	EVFA / (VFM + FTRV)	power of factor-based subsidies

* The difference between the two value flows gives value of revenue or subsidy expenditure.

2.5 GTAP Energy Volumes Data File

As shown in table 2.8, the energy volumes data file includes three arrays reporting the volume of energy purchases by firms and by households and also the volume of bilateral trade in energy products, in millions of tons of oil equivalents. The detailed documentation available online describes the construction of the energy data.

Table 2.8 Arrays in the Energy Volumes Data File

Name	Dimension	Description
EGY	n	energy commodities
EVF	$n \times t \times r$	volume of input purchases by firms (Mtoe)
EVH	$n \times r$	volume of purchases by households (Mtoe)
EVT	$e \times r \times r$	volume of bilateral trade (Mtoe)

n Number of energy commodities (sectors)

r Number of regions

t Number of tradeable commodities (sectors)

e Number of energy commodities (sectors)

2.6 GTAP 7 Data Packages

The GTAP 7 Data Base is available in two data packages - the full version and the constrained version. With the full version, the user has access to the full 57-sector x 113-region GTAP Data Base through one of two aggregation packages, FlexAgg and GTAPAgg (see chapters 4 and 5). The full GTAP Data Package includes CD-ROMs for GTAPAgg, FlexAgg, and the data documentation volume. A license file that relaxes the 10-sector by 10-region default constraint on the GTAPAgg package is included with the full version. The constrained version includes the dimension- constrained GTAPAgg aggregation package.

Both the full and constrained GTAP Data packages include the RunGTAP software. RunGTAP is a graphical user environment developed by Mark Horridge of the Centre of Policy Studies, Monash University, for use in interactively solving the GTAP model. RunGTAP allows the user to run simulations interactively in a Windows environment using the GTAP general equilibrium model.

Pricing and order information, as well as the online documentation, are available on the GTAP web site: <http://www.gtap.org>.
